Please Note: All judging is conducted by state licensed medical marijuana patients. Entries are collected and distributed under the legal frameworks of Arizona's legal medical cannabis program guidelines.

Dispensary Categories:

Indica Flowers	Indica Concentrate	CBD Flower	Hand Crafted Product
Sativa Flowers	Sativa Concentrate	CBD Concentrate	Vape Pen
Hybrid Flowers	Hybrid Concentrate	CBD Edible	Non-Solvent
Hash			
Edible			

Flowers:

Category Description

We limit the Sativa and Indica flower entries to genetic lineages that are greater than 70 percent in either species. Competitors will be required to properly categorize their entries. We reserve the right to re-categorize an entry that does not fit. You may be required to submit genetic lineage (back to grandparents) if you have an unknown strain. Hybrids can include any combination of Indica or Sativa below 70 percent (60/40, 50/50 and so on).

Competition Packaging Details

Your fourteen (14)-gram entry (This also includes CBD flower entries.) must be placed in a sealed jar. Each Jar must clearly state the name of the strain, category and company name. This should be done **ONLY ONCE** on the exterior of the jar that holds your entry.

Judging and Scoring Info

The seven categories to be scored from by each Judge are as follows: **Aroma; Taste; Visual Appeal; Strength/High; flush; Presence of seeds; and Medical Benefit.** Test Results also influence scores, the 10 major cannabinoid levels will be measured and scored. For CBD categories, the weighting of this values changes, putting more emphasis on the CBD Vs THC. *Entries found to have pesticides, mold or growth regulators will be disqualified from winning and the entries nor the entry fee will be returned.*

Concentrates & Non-Solvent Hash:

Category Description

The concentrate categories includes all forms of solvent extractions, such as oils, waxes, budders & shatters. Competitors are required to categorize their entries correctly. We reserve the right to re-categorize an entry that does not fit. You may be required to submit genetic lineage (back to grandparents) if you have an unknown strain. Hybrids can include any combination of Indica or Sativa below 70 percent (60/40, 50/50 and so on). Under no circumstances are non-cannabis derived materials allowed to be infused into concentrates or non-solvent entries. Non-solvent hash category encompasses all non-solvent concentrates, such as dry sieves, scissor hash, creams and water extractions (bubble hash).

Competition Packaging Details

Your seven (7)-gram entry must be placed in a sealed container. Each container must clearly state the name of the strain, category and company name. This should be done **ONLY ONCE** on the exterior of the container that holds your entry.

Judging and Scoring Info

The six categories to be scored from by each Judge are as follows: **Aroma; Taste; Visual Appeal; Strength/High; Smoothness; and Medical Benefit**. Test Results also influence scores, the 10 major cannabinoid levels will be measured and scored. For CBD categories, the weighting of this values changes, putting more emphasis on the CBD Vs THC. *Entries with a residual solvent level over 500ppm will be disqualified from winning and the entries nor fees shall be returned.*

Edibles:

Category Description

The Edibles category encompasses any medically infused product that is eaten or drank, including food, baked goods, tinctures, juices, sodas, capsules and pills.

Competition Packaging Details

Your seven (7)-indivial packaged entries must be placed in a sealed container. The container must clearly state the name of the strain, category and company name. This should be done **ONLY ONCE** on the exterior of the container that holds your entry. We ask that if you're edible requires refrigeration that you bring it in a cooler. The Edibles category is not blind testing but open label. This is due to the fact that dosing is an important component in the scoring of this category. Judging and Scoring of the Edibles category is the most unique and perhaps toughest to judge. We employ laboratory testing in the Edibles category, but this requires proper dosage labeling on all Edible entries so that the lab can confirm the dosage and the judge can ensure taking a single serving size (one person dosage).

Judging and Scoring Info

The six categories to be scored from by each Judge are as follows: **Food Appearance; Taste; Strength/ Effects; Product Originality; Healthiness; and Medical Benefit**. Test Results also influence scores, the 10 major cannabinoid and THC-A levels are measured and scored. The more THC-A in the product, the less points it will receive. CBD is scored purely on levels reported by the lab. The more CBD the better. This applies to both the Edibles and the CBD Edibles categories. Participants **MUST** clearly delineate exactly the total MG of cannabis infused in each product. *Entries without exact MG content or residual solvent level over 500ppm will be disqualified from winning and the entries nor fees shall be returned.*

CBD Entries:

Category Description

Samples entered in the CBD Flowers category will require a minimum of 5% CBD to compete.

Samples entered in the CBD Concentrates category will require a minimum of 25% CBD to compete. Once qualified for CBD competition, all samples will be turned over to our judges who are selected specifically because they have ailments which are treated with CBD medicine.

Competition Packaging Details

Please refer to the Flowers, Concentrates or edible information above for entry requirements, how they are graded by lab testing and how they are scored by judges.

Judging and Scoring Info

Judges also award points for symptomatic efficacy that will show the total effects of the CBD product on the patient ailments (i.e., sleep aid, pain reduction, inflammation, etc.) CBD-A levels are measured and scored. The more CBD-A in the product, the less points it will receive. CBD is scored purely on levels reported by the lab. The more CBD the better. *Edible entries without exact MG content or any entry with pesticides, mold, growth regulators or residual solvent level over 500ppm will be disqualified from winning and the entries nor fees shall be returned.*

Vape Pen Cartridge Entries:

Category Description

This category is for pre-filled vape pen cartridges only. Competitors in this category are required to submit seven (7) - pre-filled hash oil cartridges and 7 pens/ batteries. Competitors may not enter vape pens that require the manual loading of concentrate.

Competition Packaging Details

This category is not blind testing but open label. This is due to the fact that dosing is an important component in the scoring of this category additionally cartridge products often bear the manufacturer or company name, not to mention some pens are very distinct and identifiable. As such, entries in this category need be in their retail packaging. All Vapes and batteries must be placed in a sealed container. The container must clearly state the name of the strain, category and company name. This should be done **ONLY ONCE** on the exterior of the container that holds your entry. Lastly, additives such as PG or food-grade flavoring are allowable in the Vape Pen Cartridge category.

Judging and Scoring Info

The five categories to be scored from by each Judge are as follows: **Taste; Visual Aesthetics of Oil; Burn/ Cleanliness; strength/high; and Medicinal Effects.** Test Results also influence scores, the 10 major cannabinoid levels will be measured and scored. *Entries with a residual solvent level over 500ppm will be disqualified from winning and the entries nor fees shall be returned.*

Hand Crafted Product Entries:

Category Description

Hand Crafted Products (HCP's) category encompasses all products that are infused with cannabis derived materials which do not fall into one of the above aforementioned (traditional)

competition categories. This includes, but is not limited to, products such as “bud caviars”, “moon rocks”, “tarantula joints”, “thai sticks”, Cannabis terpenes or products infused with cannabis terpenes.

Competition Packaging Details

Seven (7) – HCP’s (or 7 grams dependent on product) is required and must be placed in a sealed container. The container must clearly state the name of the strain, category and company name. This should be done ONLY ONCE on the exterior of the container that holds your entry.

Competition Packaging Details

The six categories to be scored from by each Judge are as follows: **Taste; Aroma; Visual Aesthetics; Burn/ Cleanliness; High/Strength; and Medicinal Benefit.** Test Results also influence scores, the 10 major cannabinoid levels will be measured and scored. *Any entry with pesticides, mold, growth regulators or residual solvent level over 500ppm will be disqualified from winning and the entries nor fees shall be returned.*

NEW RULES ON ENTRIES:

A competitor may only win ONE award per category, regardless of how many entries they have in a category. This rule is in place to prevent competitors from “stacking the field” and ensures a level playing field for everyone involved. Because competitors will only be eligible to receive one award, the higher of the awards will be awarded and the rest dropped from award consideration. For example, if a competitor places 1st and 3rd in a category, they will win 1st Place only with the 3rd Place entry being dropped and the next highest score moving up into its place.

PLEASE ALSO NOTE: Errl Cup reserves the rights to refuse, disqualify, bar or otherwise ban any entity or individuals from participating in our Errl Cup competitions for any reason. In order to protect the integrity of the competition and ensure its fairness, safety and security for all, Errl Cup has a zero tolerance policy for any rules violations. When it comes to our Cups, one strike and you’re out. Keep it clean & keep it pure.

The Judging Process:

Errl Cup employs a two-tiered digital (online) score sheet that includes a patient score and lab score. The patient score will account for approximately 75 percent of the total score. This may vary slightly by competition category. This score sheet will be scored by each Judge and will measure his or her professional opinions of each entry. Categories are scored 1-5 by each judge (5 being the highest score). These values are not made public, meaning that both Judges and Competitors are not given the weighted values. The lab score will account for 25 percent of the total score. This may vary slightly by competition category. This data will be evaluated for errors and then uploaded into the system. The results of this score sheet will not be made available to Judges until the day of event. On the final day of judging, we will calculate each Judge’s score for each entry, and add it to the lab score produced by the uploaded lab data. The system then combines the Judges’ score with the lab score giving a final Total Score and thus our winners.

FAQ – Frequently Asked Questions

How Many Judges Are There?

There are between six and twenty five judges PER CATEGORY. This depends on entry type and how many categories we run for that particular Cup.

Who Are The Judges & How Are They Selected?

Our Judges are MMJ patients in Arizona. We randomly select our judges from the pool of patients that pre-register with us. We then go to great lengths to screen and ensure that the Judges selected match the category they are judging and that they are extremely dedicated to both the cause and the task of judging.

How do you ensure the lab accurately tests?

Before we choose a lab we go through a long vetting process. Once a lab is chosen we conduct periodic quality assurance on the lab by sending them all samples with numbers only Errl Cup can identify. We send the lab duplicate of the same sample under different numbers. We also send samples to other labs not affiliated with the event to ensure lab honesty.

What Are the Rules Regarding Disqualifications?

Errl Cup reserves the right to disqualify (DQ) entries for any rules violation and in cases where EC deems the entry, or practices of the competitor therein, to be against the spirit of fair competition. Entries that have been adulterated with non-cannabis derived products will be disqualified. Entries that have incidents of mold, bacteria, or pesticides as identified either by the competition committee or our partner labs will be privately disqualified and the competitors immediately notified. If any entry is found to have been tampered with, adulterated or doctored in any way using any synthetic, artificial, or non-cannabis organic substances, that entry will be disqualified. This includes, but is not limited to, any substance that did not originate from the original source materials (cannabis), including additives such as non-cannabis derived terpenes, oils or flavonoids, even when derived from natural or organic sources (such as fruits or flowers). This does NOT apply to entries in the “Edibles” category. These rules are solely in place for the safety and welfare of our judges and the community at large. Errl Cup does not offer refunds in the rare event of a disqualification.

Common Category Misplacements

If you believe you have a strain that exhibits a mutant phenotype that is expressed in its high or stone, we understand that. But that strain should no longer be called by its original name. Rather, we recommend renaming it to reflect this unusual deviation, such as putting a number after the name or something that denotes it is different from the norm. Here are a few strains that participants have wanted to enter into erroneous categories:

Chem Dawg is an indica.

OG Kush is an indica, not a sativa.

Sour Diesel is a Hybrid.

A Kush cross is an indica or hybrid.

All Hazes are sativas.
